

# ECO-TOURISM KUYIMA

## S.P.R DE R.L.

In our facilities we do not have facilities for people with disabilities. However we are in the best available to receive them and address them as we have done with some visitors or guests. If so, let us know your needs.

Because we are committed to the preservation of our planet, in Kuyima we use all our services and facilities certified biodegradable products.

Kuyima is currently implementing a certification process of the provisions contained in the Mexican norm NMX-AA-133-SCFI-2006 that establish the requirements and specifications of the eco-tourism sustainability. We expected to conclude this process from the beginning of May.
